

# Match Performance Trends in the English Football League (EFL)

## *Introduction*

*This project aims to analyze match trends, team performances, and referee influence in the English Football League Championship over multiple seasons. By exploring full-time and half-time results, team statistics (shots, fouls, cards, etc.), and seasonal dynamics, we seek to identify patterns that may influence match outcomes*

# Match Performance Trends in the English Football League (EFL)

## ***Conclusion***

***The Power BI dashboard offers a comprehensive view of football match statistics, enabling quick insights into team performance, goal trends, home vs. away outcomes, and referee influence. Visualizations help identify key factors like shots on target, fouls, and goal differences that contribute to match results. This interactive dashboard empowers stakeholders to make data-driven decisions and uncover patterns in match outcomes efficiently***
